

PROJECT MANAGEMENT

A PARTNER YOU CAN RELY ON

TANGIBLE SOLUTIONS

- Blentech's Project Managers "deep dive" to mitigate risk from start to finish of a project.
- Regular assessments of the project with updates that keep you informed of all possible variants, allows you to determine the best solution architecture that works for your company.

STABILITY

- One point person to manage the entire project.
- With the fast pace of your business, know our engineers are handling the details and deadlines to keep projects on track.

LARGE-SCALE PROJECTS

- Project and process engineers with industry experience in large-scale food processing systems are exactly the expert you can rely on to ensure your project is timely and accurately executed.
- Collaboration and coordination with engineering document review, installation and start up coordination and project scheduling.

EXPERTS IN THEIR FIELD

- With our wide knowledge base you get the exact resource your project requires.
- When both time and money are on the line, having the right people in place to execute timely and effectively is key. Our experts are uniquely skilled to do just that.

With decades of industry experience, Blentech is uniquely qualified to offer Project Management as a Service, or PMaaS. Our objective is to see your projects through to the end result all parties planned and expected. We have a wide and vast number of experienced engineers with a proven track record to ensure customer deadlines are met with minimal risk to the project. As our customer, it's important to us to deliver tangible, affordable, and reliable solutions. A core principle within our company is to be agile in our work and that carries over to our PMaaS. Through frequent check-in meetings to assess risks, ensure task execution and troubleshoot issues we make quality a top priority.

You know you can rely on our products and services - now rely on our people. We'll take you to your goal.
